

# report murders

*Yo*

*March 31, 2019*

## R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
library(tidyverse)
```

## Including Plots

You can also embed plots, for example:

```
load("rda/murders.rda")
```

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.

## Murder rate by state

We note the large state to state variability by generating a barplot showing the murder rate by state:
